Dear Resident,

### **Historical ground water contamination around Holden Vehicle Operations – Update 3**

I refer to my earlier letters to you in relation to our environmental testing program in the area.

Holden has now completed sampling and testing of the air within the crawl space beneath 40 homes in the area. There are others still to be tested but we greatly appreciate the cooperation of those people who have participated and the patience of the wider community during our testing.

**I am pleased to say that according to our experts and the results so far no health risk issues exist for residents.**

**In fact, all results received so far fall well below internationally accepted screening levels.**

This is great news for our neighbours.

However, our work doesn't stop there. Holden will continue with our testing program in other locations to continue to understand and monitor the situation and we will be keeping you up to date as we go. The community has remained our number one priority throughout this environmental review.

Even though the results are good, some residents may have further questions about the testing program and the results. As such, I am making our team of consultants and experts available for you to talk to at information sessions to be held at Holden Vehicle Operations, 180 Phillip Highway Elizabeth.

You don't have to come, of course, but if you would like to have any questions answered feel free to attend. The session is being held here at Holden on Thursday September 13, with four 45 minute timeslots available:

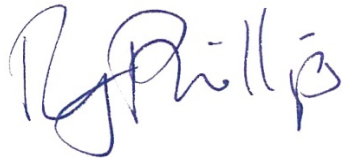

- 5:00pm – 5:45pm
- 5:45pm – 6:30pm
- 6:30pm – 7:15pm
- 7:15pm – 8:00pm

Places are limited so I would advise you to pre-book your desired time as soon as possible by calling 0427 173 336. The sessions will be held in our main Administration building, so please arrive at reception five minutes prior to your session for registration. Parking is available in the car park on Phillip Highway, opposite Holden.

Please also bring this letter along to the session.

If you have any questions in the meantime, feel free to call the EPA on 1800 729 175 (8am – 8pm weekdays).

Yours faithfully,

A handwritten signature in blue ink that reads "R Phillips". The signature is written in a cursive style with a large initial "R" and a stylized "Phillips".

Richard Phillips
