Dear Resident,

Further Environmental Investigations - Clovelly Park

As you are aware, Monroe Australia have been undertaking a range of environmental investigations in the Clovelly Park area via our environmental consultant URS Australia (now known as AECOM) based on a Voluntary Site Contamination Assessment Proposal (VSCAP). The works being undertaken by Monroe are part of a broader range of works currently underway in the Clovelly Park and Mitchell Park areas.

The testing has been looking for the chemical trichloroethylene (TCE) and some related breakdown products, following observation of TCE in soil, vapour and groundwater samples collected in the nearby area.

The most recent phase of works undertaken by Monroe involved testing of groundwater wells in the southern Clovelly Park area, as well as on the Monroe site and parts of the former Mitsubishi Motors site. This work was undertaken in May this year and the results have been reviewed by independent site contamination auditor and provided to the EPA. The testing showed that extent of groundwater contamination in the southern residential area of Clovelly Park has been identified and concentrations remain relatively stable in this area.

This letter provides you notification that a follow up groundwater sampling event is planned to commence in mid-October. You may notice contractors sampling groundwater wells in council verges and roads during this period. The aim of the monitoring is to investigate any seasonal trends in groundwater concentration and the sampling will take one to two weeks, with sampling planned to be completed by the end of October. After testing and review with the auditor and EPA, we will provide you an update of the results of this testing, we anticipate early in the New Year.

If you would like more information please contact me at Monroe Australia on 8374 5222. If you have any further questions you can also contact the EPA hotline on 1800 729 175 between 8am and 6pm on weekdays or visit the EPA website at www.epa.sa.gov.au.

I thank you for your understanding and continued cooperation in this matter and ensure minimal disruptions during this activity.

Yours sincerely
Pat Larobina
Plant Manager
