1 Introduction

In accordance with the *Environment Protection Act 1993*, Flinders Ports has prepared a Dredge Management Plan (DMP) and an Environmental Monitoring Program (EMP) to comply with the requirements of the Dredge Licence (Licence No. 50556) that was issued by the Environmental Protection Authority (EPA) on Monday, 12th March 2019.

A methodology and framework for providing public access to the approved DMP and EMP and reports generated under the licence according to condition 2.7.3 is a requirement.

This Addendum to the DMP and EMP respectively details the adopted requirements to meet this condition of the licence for the duration of the Project.

2 Framework for Public Access

A Community Engagement Plan (CEP), as required in the licence, supports the DMP and EMP. It outlines Flinders Ports planned activities and engagement approach to inform key stakeholders of the project and ensure it meets its obligations (both approval conditions and in line with Flinders Ports overall engagement strategy organisationally).

In particular it ensures that public access to the documents and reports is provided in the following manner as detailed in the CEP which is also publicly available via the Flinders Ports website.

2.1 Approved Documents under Licence

The EPA is the approval authority in administering Licence 50556. The DMP and EMP were approved by the EPA on 16th May 2019. The approved documents have been uploaded to the Flinders Ports website located at the following website:

<https://www.flindersports.com.au/about-the-project/resources/>

In accordance with the CEP, this information has been communicated to interested stakeholders and the public through various communications channels and Project updates.

The approved plans will remain on the website at all times for the duration of the Project. If any changes are required and approved by the EPA, then (once EPA approval has been received) revisions will be uploaded and will be communicated in line with the CEP process to ensure stakeholders and the public are informed.

2.2 Reporting

The DMP and EMP and Licence 50556 define the reports that are to be published as part of the licenced activity. These reports will be uploaded to the Flinders Ports website within the timeframes stipulated in Licence 50556 and the approved DMP / EMP. These will be located at the following website:

<https://www.flindersports.com.au/about-the-project/resources/>

The CEP will be implemented to ensure notification to stakeholders and the public is completed when reports are uploaded. The CEP is located at the same website as the other published documents and reports.
