

17 and 18 June 2020 – works notification

Date issued: 12 June 2020

As part of ongoing environmental assessment work in South Eastern Edwardstown which commenced in 2014, the EPA will be sampling existing soil vapour bores in your area. This work is to detect the presence of chemicals used in past industrial practices, including trichloroethene (TCE).

The work is planned on Deloraine Road and Calstock Avenue Edwardstown and traffic management may be in place where required to protect the safety of workers.

All efforts will be made to minimise any inconvenience this work may cause.

The EPA and the contractors would like to thank you very much for your patience in advance.

If you have any queries about the work, or have any access requirements you would like us to take into consideration, please contact: Sarah Verdonk on ph: 8463 4799 or via email at: engage.epa.sa.gov.au.

Seasonal Soil Vapour Monitoring Event

-  Soil Vapour Bore
-  Soil Vapour Bore to be sampled in Winter seasonal monitoring event
