Dear Resident,

Indoor Air and Soil Vapour Sampling – Clovelly Park

As you may be aware, following consultation with the EPA and the Department for Health and Ageing, Monroe Australia's environmental consultant URS Australia collected soil vapour samples within your area during February and March this year.

The testing looked mainly for the chemical trichloroethylene (TCE) and some related breakdown products, following observation of TCE in soil and groundwater samples taken in the nearby area.

Indoor air testing was also completed in six properties along Chestnut Court and these results are currently being compiled into a factual environmental assessment report by our environmental consultant.

From discussion and agreement with the EPA and the Department of Health and Ageing, we will finalise the report by the end of May. This will provide our environmental consultant sufficient time to finalise and have the report reviewed by an independent EPA accredited Site Contamination Auditor. At which time, we will discuss the results of the report with the EPA and Department for Health and Ageing and determine what further work may be necessary.

I thank you for your understanding and continued cooperation in this matter.

If you would like more information please contact me at Monroe Australia on 8374 5222. If you have any further questions you can also contact the EPA hotline on 1800 729 175 between 8am and 8pm on weekdays or visit the EPA website at www.epa.sa.gov.au.

A handwritten signature in black ink, appearing to read "Pat Larobina". The signature is fluid and cursive, written over a horizontal line.

Yours sincerely
Pat Larobina
