5th September 2012

Dear Resident,

Groundwater and Soil Vapour Assessment - Clovelly Park

As you are probably aware from previous communication by the Department of Health and Ageing in November 2008, environmental testing in Clovelly Park identified chlorinated hydrocarbons in groundwater comprising of trichloroethylene (TCE) and perchlorethylene (PCE).

TCE and PCE have been used in many industries over a long period of time, and the exact source of the contamination has yet to be determined.

Monroe Australia has voluntarily engaged a site contamination consultant to undertake an environmental assessment on our site and in the surrounding area. Monroe Australia has also engaged an independent EPA accredited Site Contamination Auditor to review, oversee and sign off on the assessment works undertaken by the consultant.

We have been working closely with our site contamination consultant, the auditor and the Environment Protection Authority (EPA) to prepare a scope of works for further assessment within Clovelly Park

As part of the environmental assessment Monroe Australia's consultant will conduct a program of groundwater (bore water) and soil vapour sampling on council road verges and public space.

This letter is therefore to advise you that the assessment will occur over a period between September and October this year. The results of the assessment will be reviewed and assessed by our consultant which will be independently reviewed by the auditor. This information will then be provided to the EPA.

Residents who would like more information can contact Monroe Australia on 8374 5222. If you have any further questions you can contact the EPA on 1800 729 175 between 8am and 8pm on weekdays or visit the EPA website at [epa.sa.gov.au](http://epa.sa.gov.au).

A handwritten signature in black ink, appearing to read "Pat Larobina". The signature is fluid and cursive, with a large loop at the end.

Yours sincerely  
Pat Larobina
